PROFESSIONAL SUMMARY

QA with strong hands-on testing experience gained through a 3-month internship at NextWaveAI, where I tested a diverse portfolio of web and mobile products end-to-end. Skilled in manual, functional, regression, basic automation, and API testing, with a proven ability to quickly ramp up on unfamiliar products, identify critical defects, and work cross-functionally with developers in Agile teams. Looking to bring this practical testing foundation into a QA Trainee role and grow into a structured, process-driven QA career.

PROFESSIONAL EXPERIENCE

Software QA Intern, NextWaveAI	05/2026 – 08/2026
- Performed manual and functional testing across different AI Products spanning both web and mobile platforms. - Reviewed requirements and user stories to identify edge cases and inconsistencies before test execution began. - Executed several test cases and validated features across multiple concurrent projects, adapting quickly to different product domains and workflows. - Conducted API testing and validation using Postman and Swagger, verifying endpoints, request/response behavior, and status codes. - Logged, tracked, and prioritized defects through the project manager portal and excel sheets, coordinating with developers to ensure timely resolution. - Carried out regression testing after bug fixes to confirm stability before releases. - Participated in daily stand-up meetings to report testing progress, flag blockers, and align priorities with the development team.	Nayabazar

SKILLS

Testing Skills

- Manual Testing
- Functional Testing
- Test Case & Execution
- Bug Reporting & Defect Tracking
- Regression Testing
- API Testing
- SDLC & STLC

Other Skills

- Attention to Detail
- Team Collaboration
- Root Cause Analysis
- Quick Learner
- Adaptability
- Time management and multitasking

Tools & Languages

- Postman
- Swagger
- Git
- JIRA
- Excel
- React
- Python
- SQL
- HTML, JavaScript

EDUCATION

BSc (HONS) Computer Science, *Herald College Kathmandu*

06/2022 – 05/2025

- Major in Information Technology
- Final CGPA: 3.00

RELEVANT PROJECTS

E-Commerce Web Platform - Group Project [LUGAAA]

09/2024

- Collaborated with developers in an Agile environment, participating in sprint reviews.
- Analyzed requirements to create test scenarios and ensure full test coverage.
- Assisted in bug tracking and defect prioritization using structured workflows.
- Contributed to improving software quality through continuous testing and feedback.
- Documented testing activities, results, and issues to support effective communication within the team.
- Participated in validating application features before deployment to ensure quality standards were met.

SheMart Online Shopping Platform - Final Year Project

05/2025

- Performed end-to-end manual testing, including test case design, test execution, and defect reporting.
- Identified and reported critical defects such as payment gateway (Khalti) failures, UI issues, and broken links.
- Created detailed bug reports with steps to reproduce, expected vs actual results, and severity levels.
- Conducted regression testing to ensure stability after bug fixes.
- Evaluated usability and user experience, identifying improvements for better accessibility.
- Verified website responsiveness across different devices and browsers to ensure consistent performance.

Spell Wizards Platform - Testing & API Validation Project

05/2026

- Performed manual UI and API testing on a web-based learning platform using Swagger and browser developer tools.
- Created and executed 50+ test cases for login, profile management, child management, chatbot, and custom words features.
- Found and reported 9+ bugs related to authentication, validation, profile actions, and API functionality.
- Tested 30+ API endpoints by checking requests, responses, status codes, and authentication behavior.
- Used browser Console and Network tabs to identify frontend and backend integration issues.
